

ARCHAEOLOGY

We undertake archaeological surveys, preliminary studies, assessments, preliminary archaeological investigations and full-scale archaeological excavations. We also perform documentation of rock carvings.

ARCHITECTURE

The physical planning assignment we perform ranges from programme and urban design to local development plans; our competence includes organizing competitions in architecture and urban design.

ART

We produce art exhibitions and perform collaboration projects in the design of urban spaces together with specialists in our other fields of knowledge. Our services encompass consulting and supervising art work and artists for commission.

ENVIRONMENTAL & COMMUNITY PLANNING

We conduct pre-studies for infrastructural development projects. Our assignments include compiling supportive information for decisions in community planning concerning environmental or cultural heritage issues.

CULTURAL HISTORY

We conduct cultural heritage studies to provide information for planning and programme processes, perform building historical studies on individual buildings or groups of buildings. Other undertakings encompass documentation of cultural heritage sites or historical industrial contexts.

LITERATURE

We arrange story-telling evenings and discussions with authors. Our publishing department publishes both fiction and fact.

EDUCATION

We provide education in all our fields of knowledge and exhibitions on themes concerning culture, nature, art and cultural history, but also courses in stone sculpting and model drawing.

RESEARCH

We are eager to learn more about all our topics. In order to be able to practice our research freely, independently and with curiosity, we have our own research fund.

Kulturlandskapet

Kultur-
landskapet

The fundamental aim of our work is an ecologically and socially sustainable society where the diversity of people's experiences can be expressed.

We must be aware of the consequences of the things we do in our everyday life.

With a deeper understanding of our history and our eco-systems, we are better prepared to make decisions about the future.

This is Kulturlandskapet!
